

**2nd KES International Symposium
on Intelligent Decision Technologies
IDT'10 in Baltimore, MD**

Session on Intelligent Agents for Gaming, Simulation, and Training

Session Co-chairs: Sheila B. Banks, Ph.D. and Martin R. Stytz, Ph.D.

This session is for papers that identify gaps in current intelligent decision technology capabilities, that discuss new research directions in intelligent decision technologies for gaming, simulation, or training, that survey promising decision technologies for gaming, simulation, or training, and that present results for decision making systems for gaming, simulation, or training applications. Topics of interest for this session include, but are not limited to, the following:

- Decision systems for intelligent agents
- Required improvements in decision systems for intelligent agents
- Intelligent agent architectures
- Hybrid reasoning systems
- Reasoning system knowledgebase development
- Reasoning system knowledgebase evaluation
- Reasoning system and decision system performance
- Reasoning system and decision system performance metrics
- Intelligent agent / human cooperative architectures
- Applications of intelligent decision technologies for gaming, simulation, and training
