Title of Session: Intelligent Decision Technologies in Accounting and Finance

Name of Chair: Lois (Yu-Cheng) Tang

Name of Co-Chairs: undecided

Description:

Intelligent Decision Technologies (IDT) have been widely used in many fields of study. This session focuses on business issues, with special attention to bankruptcy prediction, credit evaluation, property evaluation, initial public offering price evaluation, insolvency prediction, fraud detection, etc. The purpose of this invited session is to extend research in the accounting and finance domains and to explore ways that intelligent systems can make a difference.

The anticipated outcome of this session is to learn more about IDT used in accounting and finance research, understand recent developments, and generate research references. It is also a good opportunity to gain knowledge from other scholars and explore ideas for future development.
